GEORGE ASTASHENOK

Senior Automation QA Engineer
@George_G_G | george.astash@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

10+ commercial web and mobile products. Strong in manual testing, REST API and UI/UX testing and practical automation with Python. Experienced in requirements analysis, test design, release validation, defect investigation and QA process improvement. Worked on e-commerce, CRM, ERP, marketplace, service and mobile products in Agile/Scrum teams.

PROFESSIONAL EXPERIENCE

QA Engineer — AVADA MEDIA Jun 2021 – Present

- Worked as the primary QA on multiple web and mobile projects, owning testing from requirements review to release and production validation.
- Built QA processes from the ground up, introducing test checklists, regression testing, test documentation, acceptance criteria and pre-development requirements reviews.
- Reviewed requirements with developers and product stakeholders, identified missing scenarios and edge cases, and clarified acceptance criteria before implementation.
- Designed and executed functional, regression, exploratory, smoke, UAT and end-to-end testing across web and mobile products.
- Created and maintained test plans, test cases and checklists in TestRail and Confluence.
- Performed REST API testing using Postman, Swagger/OpenAPI, including HTTP methods, status codes, authentication, positive and negative scenarios.
- Independently developed automated API tests using Python, Pytest and Requests, validating endpoint behavior, response codes, response bodies, headers, authentication and business logic.
- **Developed UI automation tests using Python**, Pytest and Selenium for critical user workflows, including registration, login, form validation, dropdown selections and user interactions.
- **Automated CRUD operations** for application entities, verifying their creation, retrieval, editing and deletion through UI and API.
- Investigated defects and client-server issues using Chrome DevTools and Charles Proxy, analyzing network requests, headers, cookies and API responses.
- Used Docker and Docker Compose for local test environments and branch testing.
- Mentored 3 Junior QA Engineers, supporting onboarding, test design and daily QA practices.

Telecommunications Equipment Installer - “Beetec” Jun 2020 – Dec 2020
Telecommunications Equipment Installer - “Blacksea” Nov 2019 – Jul 2020

PRODUCT EXPERIENCE

10+ commercial products: e-commerce, CRM, ERP, marketplace, service and mobile applications. Selected: LoveLash (mobile e-commerce), Helper CRM, AutoModern (ERP/CRM), maritime crewing platform and mobile P2P marketplace .

TECHNICAL SKILLS

Testing — Testing Functional, Regression, Exploratory, Smoke, UAT, E2E, Web & Mobile Testing, Requirements Analysis, Test Design, Defect Management
API & Data — REST API, Postman, Swagger/OpenAPI, JSON, HTTP, Authentication, Data Validation
Tools — TestRail, Jira, Chrome DevTools, Charles Proxy, Git, Bitbucket, Docker, Docker Compose
Methods & AI — Agile, Scrum, Risk-based Testing, QA Process Improvement, Mentoring;
AI — assisted test design, requirements analysis, test data generation and QA documentation
Performance — Apache JMeter, DevTools - Basic

EDUCATION & CERTIFICATIONS

Hillel IT School — QA Automation Python Jun 2024 – Nov 2024
Odesa National University of Technology — Master's Degree, Technologies of Grain and Grain Business 2011 – 2017
Odesa National University of Technology — Specialist Degree, Business Economics and Control 2015 – 2018
IT Specialists Training Center ActPro — QA Engineer Jan 2021 – Apr 2021
