

GEORGE ASTASHENOK

Strong Middle QA Engineer

@George_G_G | george.astash@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

QA Engineer with 5+ years of experience in web and mobile testing across **10+ commercial products**. Strong skills in manual testing, REST API, technical analysis and requirements review. Practical experience with Python test automation.

Able to manage QA activities independently, find problems before development, analyze client-server issues and support releases. Experienced in building QA processes, improving test coverage, working with development teams and mentoring junior testers.

PROFESSIONAL EXPERIENCE

QA Engineer — AVADA MEDIA Jun 2021 – Present

Responsibilities

- Managed QA activities on multiple web and mobile projects, from requirements review to release and production checks.
- **Analyzed business logic and technical requirements before development**. Found missing cases, unclear rules and possible risks. Worked with developers and stakeholders to agree on solutions and acceptance criteria.
- Tested web and mobile applications: functional, regression, exploratory, smoke, integration, UAT and E2E testing.
- **Tested REST APIs with Postman and Swagger/OpenAPI.** Checked positive and negative cases, authentication, validation, HTTP methods, status codes and response data.
- Analyzed client-server communication, API integrations, HTTP requests, headers, cookies, sessions and responses using **Chrome DevTools and Charles Proxy**.
- Investigated defects, found possible causes, reproduced issues and provided developers with technical details.
- Planned test activities, set priorities based on risks and business impact, checked fixes and supported release validation.
- Wrote and maintained UI and API automated tests using **Python, Pytest, Selenium and Requests.**
- Used SQL for database checks and Docker/Docker Compose for local test environments.
- Worked with developers and product stakeholders to solve issues and improve product quality.
- Tested WebSocket connections, including connection stability, message exchange, real-time data updates and connection handling.
- Tested payment integrations with **Portmone, WayForPay, Stripe and PayPal**, including payment flows, API responses, transaction statuses, webhook events, error handling and payment notifications.

KEY ACHIEVEMENTS

- Built QA processes from scratch: introduced test plans, test cases, checklists, regression testing and requirements reviews before development.
- Reduced regression testing time by **35%** through test automation.
- Mentored **3 Junior QA Engineers**, helping with onboarding, test design and daily work.
- Worked as the main QA on multiple projects, taking responsibility for test coverage, product quality and release checks.

PRODUCT EXPERIENCE

10+ commercial products: e-commerce, CRM, ERP, marketplace, service and mobile applications. Selected: LoveLash (mobile e-commerce), Helper CRM, AutoModern (ERP/CRM), maritime crewing platform and mobile P2P marketplace .

TECHNICAL SKILLS

Testing: Functional, Regression, Exploratory, Smoke, Integration, UAT, E2E, Web & Mobile Testing, Risk-Based Testing.

Requirements & Test Design: Requirements Analysis, Business Logic, Acceptance Criteria, Test Planning, Test Cases, Boundary Value Analysis, Equivalence Partitioning, Negative Testing.

API & Technical Analysis: REST API, Postman, Swagger/OpenAPI, JSON, HTTP/HTTPS, Headers, Cookies, Sessions, Authentication, Authorization, API Integration, SQL.

Automation (Basic): Python, Pytest, Selenium, Requests.

Performance (Basic): Apache JMeter.

Tools: TestRail, Jira, Confluence, Chrome DevTools, Charles Proxy, Git, Bitbucket, Docker, Docker Compose.

QA Management: QA Process Improvement, Defect Investigation, Release Validation, Risk Assessment, Test Prioritization, Mentoring.

AI-assisted QA: Test Design, Requirements Analysis, Test Data Generation, Defect Analysis, QA Documentation.

Methodologies: Agile, Scrum.

ADDITIONAL EXPERIENCE

Telecommunications Equipment Installer | Blacksea | Jan 2019 – Dec 2020

- Installed, configured and diagnosed network equipment, routers and digital infrastructure.
- Connected and installed twisted-pair (Ethernet) cables and fiber-optic lines.
- Performed fiber-optic splicing and solved technical network issues.

EDUCATION & CERTIFICATIONS

- Hillel IT School — QA Automation Python Jun 2024 – Nov 2024
- Odesa National University of Technology — Master's Degree, Technologies of Grain and Grain Business 2011 – 2017
- Odesa National University of Technology — Specialist Degree, Business Economics and Control 2015 – 2018
- IT Specialists Training Center ActPro — QA Engineer Jan 2021 – Apr 2021
