

For more details, please see my portfolio:

George-ast.github.io/qa-portfolio

QA Engineer with 5+ years of experience. I test web and mobile apps, **CRM systems**, and E-commerce platforms with in **Agile/Scrum** teams. I am good at creating test documents, managing release quality, and using AI tools to write test cases, check requirements, and analyze bugs. I have a strong background in leading **QA processes**, giving tasks to the team, and **mentoring junior engineers**. I always look at tasks from the end user's point of view. I focus on finding the real causes of bugs, making work processes better, and working well with other teams.

Experience

Jun 2021 — Present

QA Engineer · [AVADA MEDIA](#)

Linkedin.com/george-ast

- Tested web and mobile apps from start to finish, checked releases, regression, and user acceptance tests (UAT). Mentored junior QA engineers to help them improve.
- Set up and managed local test environments using **Docker** and **Docker Compose**. Handled containers, switched branches, and fixed errors.
- Wrote automated tests for UI and API using **Python**, **PyTest**, **Selenium**, and **Requests** to make release checks faster.
- Tested APIs and checked network traffic using **DevTools Postman**, **Swagger**, and **Burp Suite**. Also made basic load tests with **Apache JMeter**.
- Created and updated test documents (test plans, test cases, checklists) in **TestRail** and **Confluence**.
